

AI Hands-On Workshop

See What AI Can Actually Do for Your Job

LearnAndLeverageAI.com

📅 FREE 2-HOUR SESSION

📍 WILMINGTON, DE

Your Instructor: Brandon Calloway

Not a professor. Not a researcher. **A practitioner.**

Call2Calendar

AI voice agents that answer phones 24/7

Tri-State Aquatic Services

AI handles scheduling and follow-ups

302 Photo Booth

AI manages booking inquiries and quotes

Runs **5+ businesses powered by AI**. Built this workshop because every AI course was too technical or too theoretical. *I teach what I actually do.*

The Promise

In the next **2 hours**, you will:

→ **See AI Work**

Live, in real time – no slides, no theory

→ **Use AI Yourself**

For something from *your* actual job

→ **Learn the RACE Framework**

The one framework that makes AI 10x more useful

→ **Watch an AI Agent Answer a Call**

Live demo – real phone, real AI

→ **Calculate Your AI Value**

What AI is worth to your career in dollars

☐ Not theory. Not hype. **Real tools, real demos, real results.**

BLOCK 1

What AI Actually Is

9:10 – 9:40

What AI Actually Is

AI reads your input and **predicts the most useful response**.

Not magic. Not sentient. Not going to take over the world.

What That Means for You

Type in plain English

No coding required

No software to install

Works in your browser right now

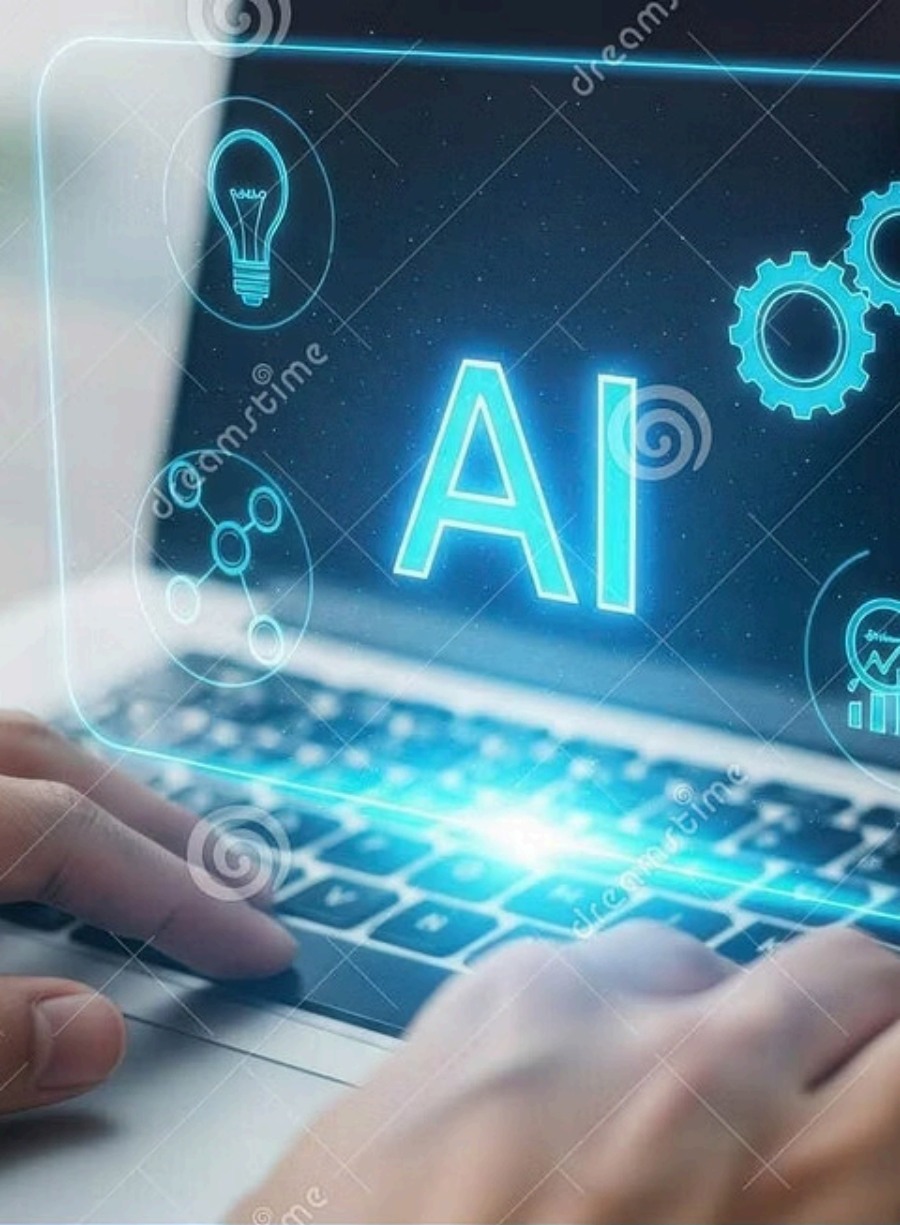

If you can write an email, you can use AI

Zero technical skills needed

The Big 4 AI Tools

Tool	Best For	Cost
ChatGPT	General tasks, most popular	Free tier available
Claude	Writing, analysis, nuance	Free tier available
Microsoft Copilot	Office 365 integration	Included with some plans
Google Gemini	Google Workspace users	Free tier available

  **Start with:** ChatGPT or Claude — both free, both powerful.

Live Demo: Watch This

Three things AI does in **under 60 seconds**:

1

Summarize a Report

3-page report → 5 bullet points, instantly

2

Write a Professional Email

Declining a meeting — polished and ready to send

3

Explain Complex Results

Quarterly financials explained like you're new to finance

No coding. No software install. **Just English.**

Your First AI Conversation

Open **ChatGPT.com** or **Claude.ai** right now.

Ask it to do something useful from **YOUR job** this week:

Email Triage

Summarize this email thread and list action items

Difficult Response

Write a professional response to this difficult email

Cross-Department Clarity

Help me explain my work to someone outside my department

 Pick one. Type it in. **See what happens.**

The One Rule

Do **not** paste confidential company data into free AI tools.

Quick Privacy Checklist

- Use the "do not train on my data" setting
- Avoid sharing SSNs, financial data, trade secrets
- For sensitive work, use your company-approved AI tools
- For everything else — AI is your new best friend

You Just Used AI

Show of hands — who got something useful?

You Typed Plain English

No special commands, no code

AI Gave You a Useful
Result

In seconds, not hours

No Training Needed

No technical skills required

AI works. You just proved it. Now let me show you how to make it **10x better.**

Scenario 2- Serendipitous Movie Discovery. (Gender Initials)

Scenari

- ① Haps
- ② Restaurant nearby
- ③ Movies nearby

A hand-drawn diagram of a card deck. It is a vertical rectangle divided into three horizontal sections. The top section contains the text "① Plan card", the middle section contains "② Search card", and the bottom section contains "③ Chat". Arrows point from the right side of each section to the right.

Prompt Engineering

9:40 – 10:05

The RACE Framework

The difference between **garbage output** and **gold**.

R — Role

Tell AI who to be

A — Action

Tell AI what to do

C — Context

Give AI the details

E — Expectations

Tell AI the format and constraints

📌 Master this framework and AI becomes your **most reliable coworker**.

Bad Prompt vs. RACE Prompt

✗ Bad Prompt

"Write me an email"

Result: Generic, useless, sounds like a robot.

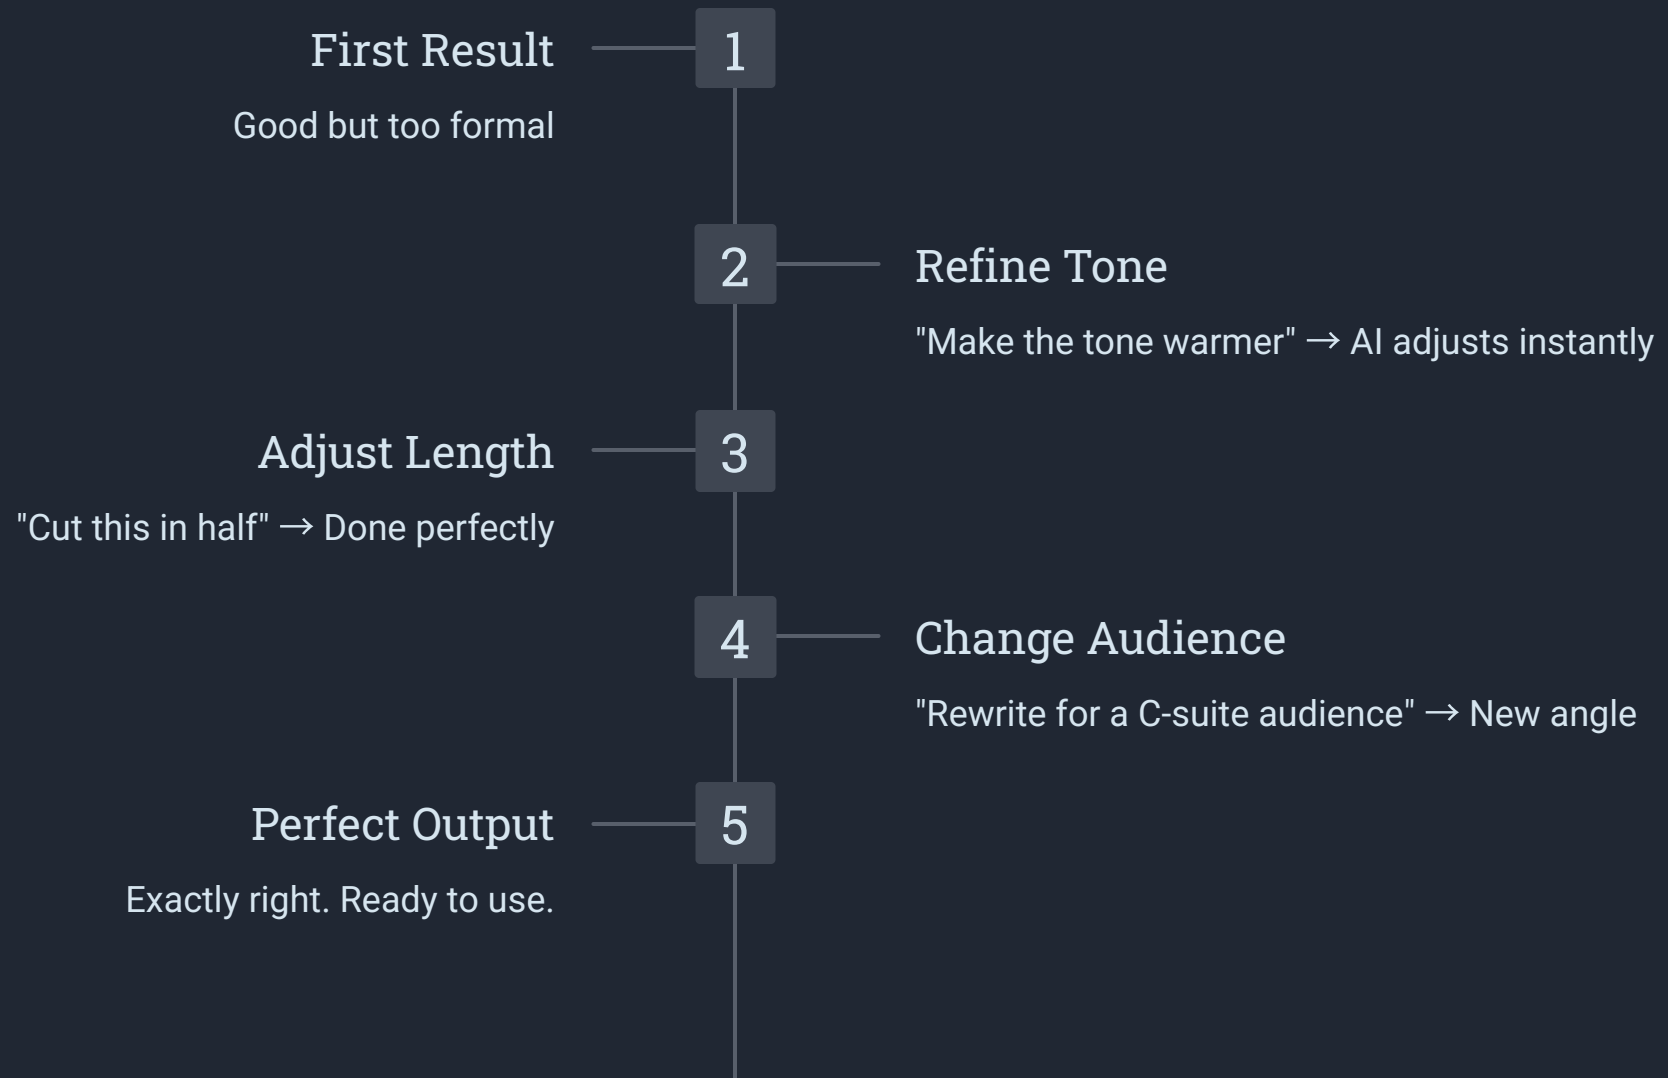

✓ RACE Prompt

- **R:** You are a senior project manager at a pharma company
- **A:** Write an email to my team
- **C:** Moving the Q3 deadline from June 15 to May 30 due to FDA feedback
- **E:** Under 200 words, professional tone, include 3 action items

Result: Exactly what you needed. Ready to send.

The Power of Iteration

AI is not one-and-done. **Talk to it like a colleague.**

Too long? *Cut this in half.* Wrong angle? *Rewrite for C-suite.* Missing something? *Add a section about timeline risks.* Iterate until it is exactly right.

Exercise: Write a RACE Prompt for YOUR Job

Pick **ONE** real task from your job this week.

1

Role

What role should AI play?

2

Action

What exactly should it do?

3

Context

What details does it need?

4

Expectations

Format, length, tone?

Type it into your AI tool. **See the difference.**

People Who Use AI Replace People Who Don't

AI does not replace people.

People who use AI replace people who do not.

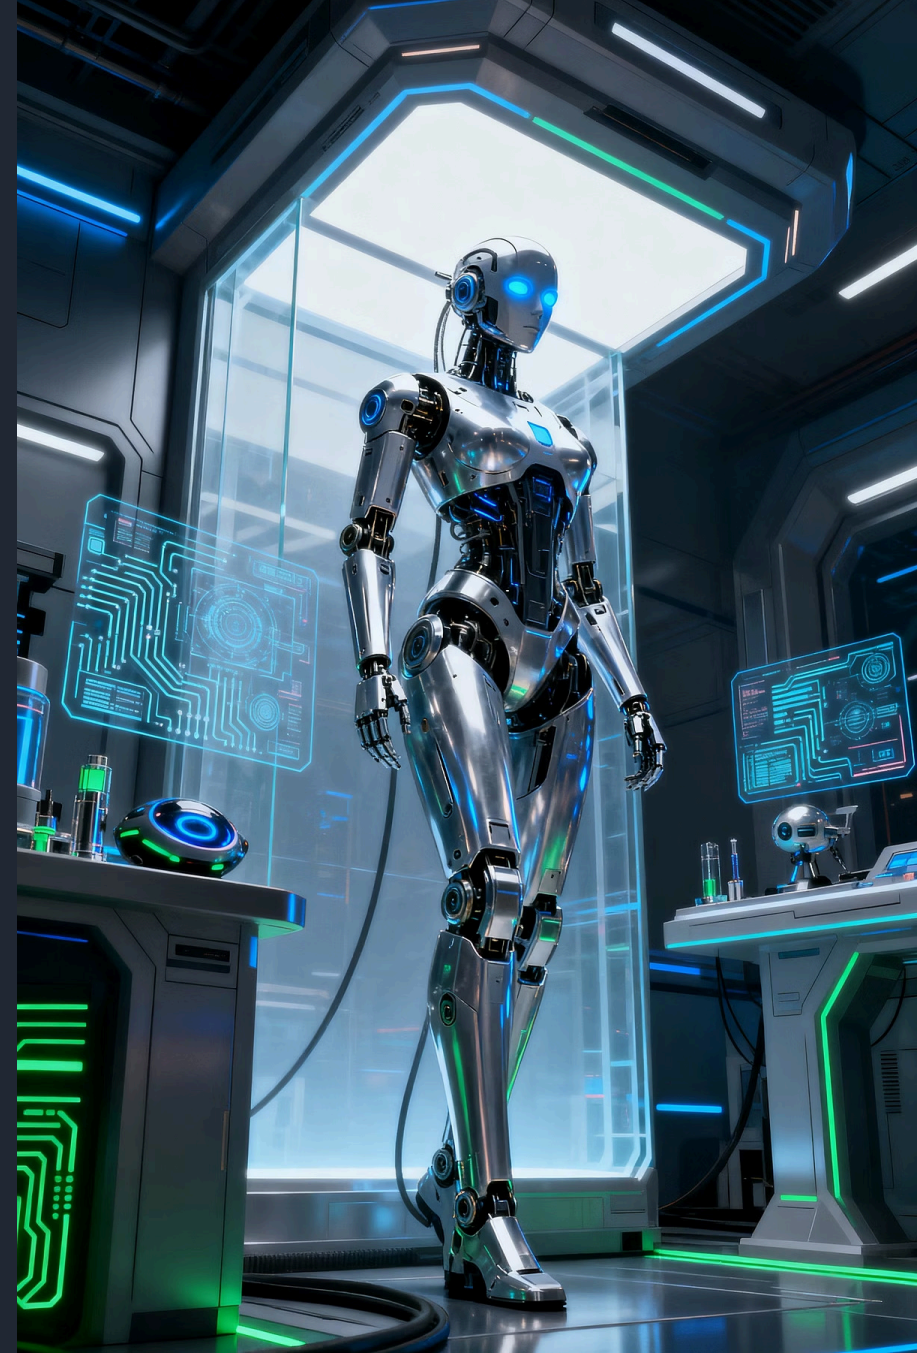

You just joined the right side.

Now let me show you something that is going to **blow your mind**.

BLOCK 3

AI Agents

10:05 – 10:20

What Is an AI Agent?

Everything So Far

AI that **writes**.

You type, it responds. Powerful — but passive.

Think less chatbot. More **employee who never sleeps**.

Now: AI That **Acts**.

- Answers phone calls
- Books appointments
- Sends follow-up messages
- Processes requests
- Works 24/7, never calls in sick

Live Demo: Call2Calendar

I am about to call one of my AI agents. **Right now. On speakerphone.**

01

AI Answers the Phone

Picks up immediately, every time

02

Has a Natural Conversation

Sounds human, responds intelligently

03

Books an Appointment

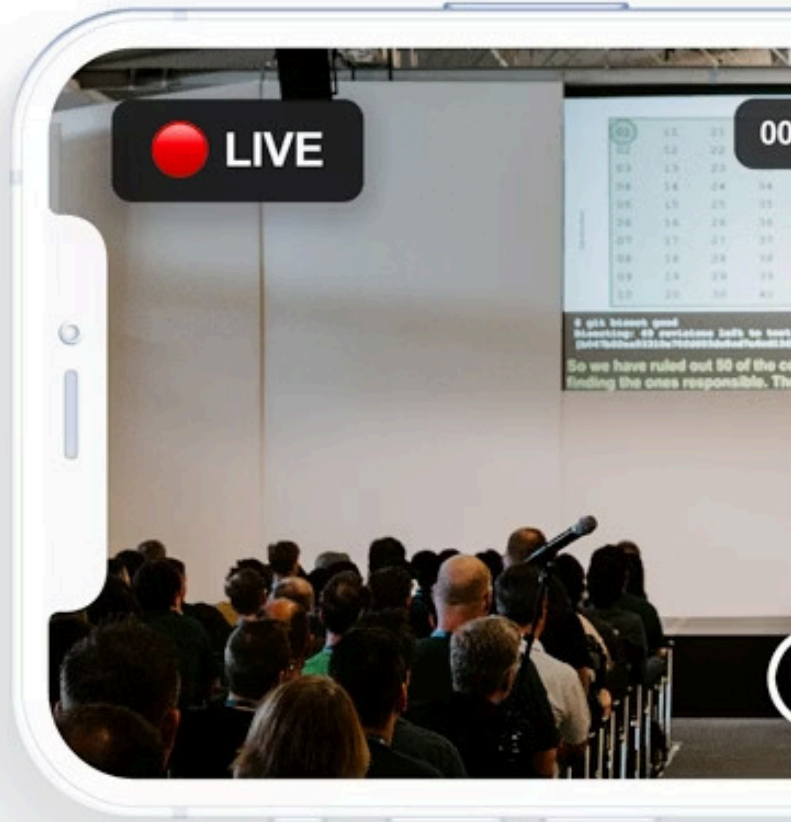

Checks availability, confirms the slot

04

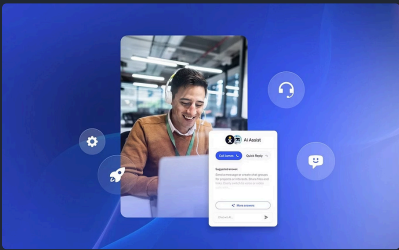

Sends a Confirmation

Automated follow-up, zero human effort

📌 My customers do not even know they are talking to AI.

My Businesses Run on AI

Call2Calendar

AI answers every call, books every appointment – 24/7, zero missed leads

Tri-State Aquatic Services

AI handles scheduling, follow-ups, and customer inquiries for my pool service company

302 Photo Booth

AI manages booking inquiries and generates quotes automatically

Three businesses. AI runs the front office of all of them.

This Is What I Actually Build and Run

I am not teaching from a textbook. I am showing you what I do every single day.

The AI Agents I Build

Custom-built for real business problems

The Businesses They Run

Front office fully automated

The Time They Save

Hours back every single week

The Money They Make

Revenue that runs while I sleep

If AI can run my businesses, imagine what it can do for **your job**.

BLOCK 4

What Is Possible

10:20 – 10:30

The Math: What AI Is Worth to YOU

The Time Equation

One task you do daily: **30 minutes**

With AI: **2 minutes**

Time saved per day: **28 minutes**

$28 \text{ min} \times 5 \text{ days} = \mathbf{2.3 \text{ hours/week}}$

$2.3 \text{ hours} \times 50 \text{ weeks} = \mathbf{115 \text{ hours/year}}$

Your Dollar Value

\$5,750

At \$50/hr

Saved per year

\$8,625

At \$75/hr

Saved per year

\$11,500

At \$100/hr

Saved per year

📌 That is **ONE task**. You have dozens.

Quick Toolkit Preview

What we covered today is **the tip of the iceberg**.

Custom AI Instructions

So AI knows your role permanently — no re-explaining every time

Prompt Libraries

50+ ready-to-use prompts for your specific job function

Automation Workflows

AI that runs while you sleep — tasks completed without you

Full AI Agent Deep Dives

Build your own digital employee from scratch

Monday Morning Action Plan

Start using AI the moment you leave this room

That is what the **full workshop** covers.

Today Was the Appetizer

You now know:

What AI Is and How It Works

A prediction machine you control with plain English

How to Write Effective Prompts Using RACE

The framework that turns garbage into gold

What AI Agents Are and What They Can Do

Digital employees that work 24/7

What AI Is Worth to Your Career

Thousands of dollars in time saved — from one task

But we barely scratched the surface. **The full meal is waiting.**

What We Covered Today

In 2 hours, you:

Used AI for the First Time

Or got dramatically better at it

Learned the RACE Framework

For consistent, professional results every time

Saw a Live AI Agent Answer a Call

Real phone, real AI, real business

Calculated Your AI Value

What AI is worth to your career in real dollars

Show of hands: How confident do you feel about AI right now compared to 9 AM?

Ready to Go Deeper?

Full AI Workshop — \$297
